EDUCATION AND TRAINING

- B.S., Mathematics. Northeastern University, Boston, MA, 2011
- M.S., Biostatistics. University of Washington, Seattle, WA, 2015
- Ph.D., Biostatistics. University of Washington, Seattle, WA, 2016

Dissertation: Recovering Natural History: Modeling Cardiovascular Biomarkers in the Presence of Endogenous Medication Use

- Postdoctoral Researcher, University of Pennsylvania, Department of Biostatistics, Epidemiology, and Informatics, and Center for Causal Inference, 2016–2018
- Associate Fellow, Leonard Davis Institute of Health Economics, 2017–2018

ACADEMIC APPOINTMENTS

- Assistant Professor of Biostatistics, Vanderbilt University Medical Center, 2018–

OTHER EMPLOYMENT

- Research Assistant, Beth Israel Deaconess Medical Center, 2010–2012
- Research Assistant, Collaborative Health Studies Coordinating Center, 2012–2015
- Research Assistant, Fred Hutchinson Cancer Research Center, 2015–2016

PROFESSIONAL ORGANIZATIONS

- International Biometric Society (Eastern North American Region), 2014–
- American Statistical Association, 2015–
- International Biometric Society (Western North American Region), 2015–2017

PROFESSIONAL ACTIVITIES: INTRAMURAL

University of Washington

- Student Representative, Departmental Self-Study Committee, 2012–2013
- Facilitator, University of Washington Annual TA/RA Conference, 2015
- Member, Educational Policy and Teaching Evaluation Committee, 2014–2016
- Member, Faculty/Student Relations Committee, 2015–2016

University of Pennsylvania, Department of Biostatistics, Epidemiology, and Informatics

- Member, Post-Doc Training Task Force, 2017-2018

Vanderbilt University Medical Center, Department of Biostatistics

- Founder/Organizer, Vanderbilt Causal Inference Workshop, 2018–
- Organizer, Weekly Biostatistics Seminar Series, 2018–
- Member, Faculty Search Committee, 2019–
- Member, Strategic Directions Committee, 2019–
- Member, Qualifying Exam Committee, 2019–
- Member, Selection Committee for Arbogast Collaborative Award, 2020

Vanderbilt University Medical Center

- DSMB, The Effect and Contribution of a Perioperative Ketamine Infusion in an Established Enhanced Recovery Pathway (B. Raymond, P.I.), 2021–
- Member, Geoffrey Fleming Academy for Excellence in Education Mentorship Program, 2021–

PROFESSIONAL ACTIVITIES: EXTRAMURAL

Committees

- Member, ENAR Distinguished Student Paper Awards Committee (2018, 2019, 2020)
- Member, David P. Byar Young Investigator Award Committee, (2018, 2019)
- ENAR Poster Session Judge (2019)
- ICSA Applied Statistics Symposium Poster Session Judge (2020)

Leadership

1. Program Chair, Biometrics Section, Joint Statistical Meetings (2022)

Conference sessions organized and chaired

1. Chair: Survival Analysis and Semi-parametric and Non-parametric Models. ENAR: Washington, D.C., March 2017.
2. Chair: Recent Developments in Observational Data. WNAR: Santa Fe, NM, June 2017.
3. Chair: Comparative Effectiveness Research. ENAR: Atlanta, GA, March 2018.
4. Organizer and Chair: Recent Advances in Bayesian Methods for Cost and Cost-Effectiveness Analysis. ICHPS: San Diego, CA, January 2020.
5. Organizer and Chair: Recent Advances in Causal Inference. 13th International Conference on Computational and Methodological Statistics: London, UK, December 2021.

Editorial service

Associate Editor

- *Observational Studies* (2021–)

Reviewer

- *British Medical Journal* (2016)
- *Pharmacoepidemiology and Drug Safety* (2016, 2017)
- *American Journal of Epidemiology* (2015, 2016, 2017, 2018)
- *Journal of the American Statistical Association* (2017, 2018)
- *PLOS One* (2018)
- *International Journal of Biostatistics* (2017, 2019, 2020)
- *Cancer* (2020)
- *International Journal of Epidemiology* (2020)
- *Observational Studies* (2020)
- *Biostatistics* (2016, 2017, 2020)
- *Statistics and its Interface* (2021)
- *Circulation: Cardiovascular Quality and Outcomes* (2018, 2019, 2021)
- *Journal of the Royal Statistical Society, Series C* (2016, 2021)
- *Statistics in Medicine* (2019, 2020, 2021)

Awards and honors

- University of Washington Department of Biostatistics Retreat: Best Research Poster Award (as selected by incoming students), 2013
- University of Washington Department of Biostatistics: Outstanding Teaching Assistant Award, 2014
- WNAR Student Paper Competition: Most Outstanding Paper Award, 2015
- WNAR Student Paper Competition: Most Outstanding Oral Presentation Award, 2015
- Atlantic Causal Inference Conference: Ten Have Poster Presentation Award Runner-up, 2017
- Outstanding Faculty Mentor Award, Vanderbilt University Department of Biostatistics, 2020

TEACHING ACTIVITIES AND MENTORING

Instructor: Graduate courses

University of Pennsylvania Perelman School of Medicine

- Health Policy Research 604 - Introduction to Statistics for Health Policy (Autumn 2017)
Enrollment: 24

Vanderbilt University Medical Center

- Biostatistics 6312 - Modern Regression Analysis (Spring 2020)
Enrollment: 19

- Biostatistics 6312 - Modern Regression Analysis (Spring 2021)
Enrollment: 18

Instructor: Undergraduate courses

University of Washington

- Biostatistics 311 - Regression Methods in the Health Sciences (Spring 2016)
Enrollment: 7

Instructor: High school courses

Massachusetts Institute of Technology Educational Studies Program

- Counting Principles (Summer 2009)
- Calculus AB (September 2009 - May 2010)
- Multivariable Calculus (Summer 2010)
- Counting Principles (Summer 2011)
- Calculus BC (September 2010 - May 2011)
- Calculus BC (September 2011 - May 2012)

Instructor: Short courses

Vanderbilt Center for Quantitative Science Summer Institute

- Introduction to Causal Inference (August 2019)

Massachusetts Institute of Technology Educational Studies Program

- Introduction to Calculus (2008, 2009)
- Group Theory (2008, 2009)
- Number Theory (2009)
- Stochastic Processes (2009)
- Introduction to Topology (2009)
- Introduction to Real Analysis (2009)
- Complex Variables (2009, 2010)

Graduate Teaching Assistantships

University of Washington

- Biostatistics 524 - Design of Medical Studies (Spring 2014)
Enrollment: 34
- Biostatistics 570 - Advanced Regression Methods I (Autumn 2014)
Enrollment: 44
- Biostatistics 571 - Advanced Regression Methods II (Winter 2015)
Enrollment: 36

- Biostatistics 524 - Design of Medical Studies (Spring 2015)
Enrollment: 38

Research supervision

Primary advisor

- Aaron Lee (MS, Biostatistics)
- Caroline Birdrow (MS, Biostatistics)
- Jamie Joseph (PhD, Biostatistics)

Committee member

- Thomas Klink (MPH, Global Health Track, 2019); Statistical mentor
- Varvara Probst (MPH, Epidemiology Track, 2020); Statistical mentor
- Nicholas Illenberger (PhD, Biostatistics; University of Pennsylvania); Committee member
- Julia Thome (PhD, Biostatistics); Committee chair

Other advising and mentoring

- Marlena Norwood (*Ad hoc* undergraduate honors project), 2016
Topic: Simulation studies and nonparametric bootstrapping methods

RESEARCH PROGRAM

Ongoing research

P30 CA 068485-25 (Pietenpol) NIH/NCI <i>Cancer Center Support Grant</i>	09/01/20 – 08/31/25	10% Role: Biostatistician
P50 CA 098131-18 (Pietenpol) NIH/NCI <i>SPORE in Breast Cancer</i>	08/07/03 – 07/21/24	10% Role: Biostatistician
K12 HL 137943-04 (Kripalani) NIH/NHLBI <i>Vanderbilt Scholars in T4 Translational Research (V-STTAR) Program</i>	09/01/17 – 08/31/22	10% Role: Biostatistician
U01 IP 001063-05-00 (Halasa) NIH/NCIRD <i>Enhanced Surveillance for New Vaccine Preventable Diseases</i>	09/01/16 – 08/31/21	10% Role: Biostatistician
U01 AI 135950-03 (Krams) NIH/NCIRD <i>Exosomes and the Immune Response in Allograft Outcomes in Pediatric Transplant Recipients</i>	02/01/18 – 01/31/21	5% Role: Biostatistician
U01 AI 132004-03 (Halasa) NIH/NIAID <i>High vs. Standard Dose Flu Vaccine in Adult Stem Cell Transplant Recipients</i>	07/05/17 – 06/30/20	5% Role: Biostatistician

R34 AI 150532-01 (Halasa) 06/04/20 – 05/31/21 5%
 NIH/NIAID Role: Co-Investigator
High vs. Standard Dose Flu Vaccine in Pediatric Solid Organ Transplant Recipients

U01 AI 152967-01 (Halasa) 09/01/20 – 06/30/25 5%
 NIH/NIAID Role: Co-Investigator
Comparison of High vs. Standard Dose Influenza Vaccines in Adult Solid Organ Transplant Recipients

R21 AI 149303-01 (Halasa) 09/01/20 – 06/30/25 5%
 NIH/NIAID Role: Co-Investigator
Adenovirus Types and Acute Respiratory Illness Severity in Children

PMR2065-1B (Grijalva) 10/19/15 – 03/21/21 15%
 NIH/NIAID Role: Biostatistician
Adenovirus Types and Acute Respiratory Illness Severity in Children

Completed research

U01 AI 125135-03 (Halasa) 08/19/16 – 07/31/19 Role: Biostatistician
 NIH/NIAID
Comparison of High vs. Standard Dose Flu Vaccine in Pediatric Stem Cell Transplant Recipients

P30 DK 092986-08 (Elasz) 08/01/18 – 07/31/19 Role: Biostatistician
 NIH/NIDDK
Center for Diabetes Research Pilot & Feasibility Award

RWJF 76037 (Schmidt) 12/01/18 – 11/30/19 Role: Site PI
Implementation of Medicaid Work Requirements: Factors Influencing Physician Willingness to Request Exemptions

R01 DK 100694-06 (Mayberry) 07/14/14 – 04/30/21 10%
 NIH/NIDDK Role: Biostatistician
Improving Medication Adherence Among Underserved Patients with Type 2 Diabetes

PRESENTATIONS

Invited workshops

1. Computing session for propensity score methods. First Causal Inference and Big Data Summer Institute: Philadelphia, PA, July 2017.
2. Computing session for propensity score and matching methods. Second Causal Inference and Big Data Summer Institute: Philadelphia, PA, June 2018.
3. Introduction to causal inference. Causal Inference and Pharmacoepidemiology Summer Institute: Piscataway, NJ, July 2019.
4. Propensity scores: Matching and inverse probability of treatment weighting. Summer Short Course on Causal Inference, University of Pennsylvania Center for Causal Inference (Virtual), June 2020.
5. Propensity scores: Matching and inverse probability of treatment weighting. Causality in Clinical Research: What, Why, When and How, University of Pennsylvania Center for Causal Inference (Virtual), December 2020.
6. Propensity score and matching methods. Vanderbilt University Medical Center, Department of Biostatistics Continuing Education Seminar Series (Virtual), January 2021.

Invited conference presentations

1. Causal approaches to cost and cost-effectiveness analysis with time-dependent treatment regimes. ENAR: Atlanta, GA, March 2018.
2. Approaches to cost-effectiveness analysis based on individual monetary benefit. ENAR: Philadelphia, PA, March 2019.
3. Population-level cost-effectiveness analysis: The individual net benefit from a causal perspective. Third International Conference on Econometrics and Statistics: Taichung, Taiwan, June 2019.
4. Comment on “Penalized Spline of Propensity Methods for Treatment by Zhou, Elliott, and Little”. JSM: Denver, CO, July 2019.
5. A second-generation cost-effectiveness acceptability curve based on the Bayesian credible interval for net monetary benefit. International Conference on Health Policy Statistics: San Diego, CA, January 2020.
6. Bounds for local average treatment effects in instrumental variable analyses of mobile interventions. ICSA Applied Statistics Symposium (Virtual): December 2020.
7. Bounding local average treatment effects under exclusion-restriction violations in mobile health interventions. Fourth International Conference on Econometrics and Statistics (Virtual): June 2021.
8. Semi-parametric estimation of biomarker age trends with endogenous medication use in longitudinal data. Thirteenth International Conference on Computational and Methodological Statistics: London, UK, December 2021.

Department seminars

1. Flexible modeling of biomarker associations in the presence of endogenous treatment. Collaborative Health Studies Coordinating Center. Seattle, WA, March 2015.
2. Extending Heckman's treatment effects model to allow heterogeneity in the effects of medication use. FDA Center for Drug Evaluation and Research. White Oak, MD, September 2015.
3. Understanding natural history in the presence of endogenous medication use. Weill Cornell Medical College Division of Biostatistics and Epidemiology. New York, NY, January 2016.
4. Accounting for endogenous medication use when estimating natural biomarker associations using observational data. Stanford Medicine Quantitative Sciences Unit. Palo Alto, CA, March 2016.
5. Recovering natural history: Modeling biomarker age trends in the presence of endogenous medication use. University of Pennsylvania Division of Biostatistics. Philadelphia, PA, October 2016.
6. The nested g-formula: A causal approach to analysis of medical cost data in the presence of censoring. University of Washington, Collaborative Health Studies Coordinating Center. Seattle, WA, May 2017.
7. Analyzing medical cost outcomes with time-dependent treatment. New York University Department of Population Health. New York, NY, October 2017.
8. The nested g-formula: A causal approach for analyzing medical cost outcomes. New York University Division of Biostatistics. New York, NY, January 2018.
9. The nested g-formula: A causal approach for analyzing medical cost outcomes. University of Pennsylvania Division of Biostatistics. Philadelphia, PA, January 2018.
10. The nested g-formula: A causal approach for analyzing medical cost outcomes. University of British Columbia Department of Statistics. Vancouver, BC, January 2018.
11. Analyzing medical cost outcomes with time-dependent treatment. British Columbia Children's Hospital Research Institute. Vancouver, BC, January 2018.
12. The nested g-formula: A causal approach for analyzing medical cost outcomes. University of Utah Department of Population Health. Salt Lake City, UT, February 2018.
13. Analyzing medical cost outcomes with time-dependent treatment. Huntsman Cancer Institute. Salt Lake City, UT, February 2018.
14. Analyzing medical cost outcomes with time-dependent treatment. University of Massachusetts Amherst Department of Biostatistics. Amherst, MA, February 2018.
15. The nested g-formula: A causal approach for analyzing medical cost outcomes. Vanderbilt University Department of Biostatistics Seminar. Nashville, TN, February 2018.
16. Analyzing cost outcomes with time-varying treatment: Guidance for resource allocation and health policy decisions. Drexel University Biostatistics Seminar. Philadelphia, PA, February 2018.

17. Analyzing cost outcomes with time-varying treatment: Guidance for resource allocation and health policy decisions. State University of New York at Albany Epidemiology and Biostatistics Seminar. Albany, NY, February 2018.
18. Using observational data to aggregate evidence of clinical efficacy with information on medical costs. Vanderbilt University Medical Center Department of Biomedical Informatics. Nashville, TN, February 2019.
19. Bounding local average treatment effects in studies of engagement with mobile interventions. University of Québec at Montréal (Virtual). September 2020.
20. Bounding local average treatment effects in studies of engagement with mobile interventions. University of Pennsylvania Center for Causal Inference (Virtual). October 2020.
21. Bounding local average treatment effects in studies of engagement with mobile interventions. Fox Chase Cancer Center (Virtual). January 2021.
22. Bounding local average treatment effects in studies of engagement with mobile interventions. Vanderbilt University Medical Center Department of Biostatistics (Virtual). January 2021.
23. Bounding local average treatment effects in studies of engagement with mobile interventions. University of California at Davis (Virtual). March 2021.

Contributed conference presentations

1. (Oral) A comparison of methods for biomarker associations with endogenous treatment. ENAR: Baltimore, MD, March 2014.
2. (Oral) Extending Heckman's treatment effects model to allow for treatment heterogeneity. WNAR: Boise, ID, June 2015. (WNAR Most Outstanding Oral Presentation Award).
3. (Oral) Extending Heckman's treatment effects model to non-additive treatment effects. Joint Statistical Meetings: Seattle, WA, August 2015.
4. (Oral) Accounting for heterogeneity when evaluating surrogate endpoints in a discrete-time survival model. ENAR: Austin, TX, March 2016.
5. (Oral) A constrained covariance modeling approach for estimation of marginal age trends in the presence of endogenous medication use. ENAR: Washington, D.C., March 2017.
6. (Poster) A nested g-computation approach for analysis of censored medical cost data. Atlantic Causal Inference Conference: Chapel Hill, NC, May 2017. (Thomas R. Ten Have Poster Session Runner-up).
7. (Oral) A nested g-computation approach to analyze medical cost outcomes in the presence of censoring. WNAR: Santa Fe, NM, June 2017.
8. (Oral) A new direction for health policy decisions based on subgroup discovery: The cost-effectiveness determination curve. Joint Statistical Meetings: Vancouver, BC, August 2018.

9. (Oral) Bounding local average treatment effects in studies of engagement with mobile interventions. ENAR (Virtual). March 2021.

STATISTICAL SOFTWARE PACKAGES (R)

- `uwIntroStats`: Emerson SS, Spieker AJ, Williamson BD, Hee Wai T, Lim S. Descriptive Statistics, Inference, Regression, and Plotting in an Intro Stats. Course.
- `endogenous`: Spieker AJ. Classical Simultaneous Equation Models.
